

SUCCESS AT THE INTERNATIONAL MOTOR SHOW IN GENEVA

Carlsson is present on the most important European automobile show in hall 5, booth 5130 with four cars and many accessories. On Tuesday and Wednesday, many VIP customers and a lot of press celebrated the world premiere of the Carlsson C25 with great enthusiasm. Impressive are not only the performance details like the V12 engine with 753 hp, 1150 rpm and a top speed of more than 350 km/h but also a breathtaking design and the high exclusiveness. Every car will be as individually as his owner. Further cars and items on display show the variety of the Carlsson programme for Mercedes-Benz automobiles.

WHEEL/TYRE SETS DESIGN 1/11 EVO BE

Elegant Design for a special appearance. The automobile manufacturer Carlsson now offers its light alloy wheel 1/11 Evo Brilliant Edition for a special price. The wheel design is now available as complete wheel sets with top brand tyres by Vredestein, Dunlop or Continental in 20 or 21 inches already mounted and electronically balanced.

CARLSSON RELIES ON MOTOR OILS BY FUCHS

The name Carlsson represents extraordinary design and high-performance engines which challenge the performance of the motor oil. Therefore all vehicles and engines that leave the Carlsson manufactory are equipped with Titan GT1 motor oils by Fuchs. The high reliability and performance of the Titan GT1 oils especially in racing are decisive for the choice as first-use motor oil. Carlsson and Fuchs will exhibit the CD35 based on the E-class E350CDI at the shared stand of the ZDK at the AMITEC in Leipzig, Germany from April 10th to 14th, 2010. Fuchs and Carlsson will also participate in the rally across the exhibition area at the Auto-mechanika.

CARLSSON: LEADER IN PEDESTRIAN PROTECTION

Carlsson not only sets the bar for design and quality in its products, pedestrians also benefit from the engineers from Merzig. The Carlsson front skirts- and LED-daytime running lights passed the stringent requirements of the Federal Highway Research Institute's EC directive-based tests with flying colours.
