

WORLD PREMIERE CARLSSON E-CLASS

THE NEW CARLSSON E-CLASS W212 ON THE TUNING WORLD BODENSEE 2009 / EXHIBITION HALL B5, STAND 301

With the new E-class (W 212), Carlsson combines sportiness and elegance. The automobile manufacturer introduces the refined upper medium-class Mercedes in Friedrichshafen from April 30th to May 3rd. On the occasion of the start of the season, the leading lights of the international automobile- and tuning sector come together at the Tuning World Bodensee. In exhibition hall B5 at stand 301, Carlsson presents spectacular Smart- and Mercedes-automobiles and the current wheel programme from its own manufacture in Merzig/Saarland. The world première of the Carlsson E-class will be the highlight. The refinement includes an entire aerodynamics kit, the intelligent lowering kit C-Tronic® SUSPENSION, the re-engineered interior, an enormous performance enhancement and sporty wheels. **All parts can be ordered at our online shop from now on.**

PERFECT QUALITY – ALWAYS WITH A THREE-YEAR WARRANTY

Carlsson has amended its warranty guidelines according to the Mercedes Benz Manufacturer Warranty.

Therefore, an extended Carlsson 3-year warranty is effective from April 2009! In addition to the Mercedes Benz Manufacturer Warranty, an extensive warranty came into force! The Carlsson 3-year warranty amends the continuously existing Mercedes Benz Manufacturer Warranty. No matter if it is a new or used car. Carlsson explicitly points out that the Mercedes Benz Manufacturing Warranty is still valid after the quality-proved and homologated Carlsson products are fitted and it is supplemented with a three-year warranty by Carlsson. The exact warranty conditions are stored at www.carlsson.de

CARLSSON C-TRONIC® SUSPENSION: INTELLIGENT LOWERING

With the new Carlsson C-Tronic® Suspension, Carlsson offers its latest development at an even more attractive price. For the current 2009 chassis technology version the communication within the vehicle has been optimized in elaborate tests. The Carlsson chassis' control unit now controls the engine electronics and thus

achieves better results in driving dynamics and performance reliability. The additional module C-Tronic® SUSPENSION to lower the car individually adjustable for both axles up to 42 millimeters is available for E-class, CLS-class, S-class, CL-class, SL-roadster, ML-class, GL-class and R-class. Recommended retail price 990,-€.

CARLSSON ACHIEVES THE SQUARING OF THE CIRCLE: SPORT-/TOURING LIMOUSINE CK63S WITH 565 HP

The core part of this refinement is the enhanced engine. The renowned automobile manufacturer Carlsson is approved by the federal motor transport authority and its engineers pull out an unbelievable 565 hp (415 kW) out of the 6.3 litre V8. This is nearly a quarter more output than the AMG engine which provides 457 hp (336 kW) out of the same cubic capacity. The maximum torque rises from 600 Newton metres in the AMG to an impressive 685 Newton metres in the CK63S. Therefore, the Carlsson C-class accelerates from zero to one hundred in only 3.8 seconds and is therefore another 0.7 seconds faster than the already speedy 4.5 seconds in the serial edition. For the optimal road handling Carlsson offers the Adjustable Coilover Kit. This allows a continuous traction- and compression phase and therefore a perfect adjustment. The entirely new aerodynamics kit renders the necessary road grip. The front- and rear spoiler and the front spoiler lip are made of Polyurethane (PU) and real carbon and therefore guarantee best-possible

material strength at an extremely low weight. Moreover, the high-quality sport character is enhanced by the forged light alloy wheels 1/16 from the Ultra-Light series. Price Performance Kit CK63 starting at 3.499,-€ recommended retail price.

SHOW WINNER IN BUCHAREST

Together with the new importer for Romania, the company MBM Professional Tuning S.R.L., Carlsson presented the highlights from the Carlsson programme at the Romexpo in Bucharest 10.04 - 12.04.2009. The absolute hit was the Carlsson CK 63 RS based on the SL63 AMG. The roadster rendering 600 hp after the refinement won the cup for the best show car.
