

CARLSSON PROGRAM FOR THE E-CLASS CONVERTIBLE

Summer is about to arrive and therefore it is not surprising that the Carlsson engineers are already in the front line to make the open-air season even more enjoyable with the new Mercedes E-Class Convertible. The programme, which is available now, includes a discreet aerodynamic

body kit, sport suspension and performance kits for gasoline- and diesel engines. Carlsson wheels and chrome tailpipes further contribute to the uniqueness of this new model and make it stand out even more from the crowd of convertibles in the summer season.

COMPLETE PROGRAM FOR MERCEDES S-CLASS FACELIFT

Luxury or sport - these are the two concepts that many people have to decide between when buying a new car. The automobile manufacturer Carlsson now combines both in its programme for the new Mercedes S-Class (from year of prod. 06/09 on). The entirely new developed front spoiler, which is available for the new standard S-Class as well as for the S63/65AMG, together with the lower suspension setting give the luxury sedan a very sporty, yet classy appearance.

CARLSSON SMART C25 EDITION

At this years Tuning World Bodensee fair Carlsson presented besides the Mercedes C63 RS (based on C63 AMG) and the Carlsson-Aigner CK55 RS Rascasse (based on GL550) its latest project: Inspired by the recently presented C25, the Carlsson smart Turbo features an exceptional design and lots of valuable materials in the interior. The Carlsson sport-leather trim, together with the aerodynamic kit and the sport end pipes fascinated many visitors at the Bodensee fair. The combination of black, graphite grey and speedorange clearly show the origin of the design idea and make this smart C25 colour concept a real eye catcher.
