

CARLSSON CK63RS AT THE KÜS DRIVING TRAINING

The KÜS (organization for observation of road safety) has successfully ended its traffic safety campaign for young drivers, „Jung fährt sicher 2.0“ with a safe driving training at the Nürburgring. The 25 places for the training with the famous racing driver and Carlsson brand ambassador Ellen Lohr had been issued through a drawing among the participants of the traffic safety campaign. The training provided useful information about road safety and prepared the young driv-

ers for precarious situations. However, fun didn't come short at the Nürburgring. The Mercedes tuner Carlsson brought along a stunning car, the CK63RS with 600hp, which gave the young drivers an insight into how complex and sophisticated tuning actually is. Afterwards they were given the opportunity to take a ride with the racing driver Ellen Lohr who showed them how to drive such a car at the limit.

BODENSEE SMART-TOUR 2010

Smart-enthusiasts from all over Germany met in Aulendorf (Baden-Württemberg) on the fifth of June to take part in the 9th Smarttour Bodensee. More than 150 cars were brought along to the trip which started in Germany and lead through Austria and Switzerland. Of course the Carlsson team was also present at the event and drew a lot of attention to its Smart C25 Edition, which had been presented at the Tuning World recently.

CARLSSON EXCLUSIVE PARTNER OF THE YAMAHA HORSE SHOW 2010

Already for the sixth time, Carlsson was the exclusive Partner of the renowned Yamaha Horse Show 2010. The venue of the contest was the Yamaha Tsumagoi Resort in Shizuoka which is more than 80.000 square metres in size and is mainly used for concerts and sport events. More than 150 equestrians participated in this year's contest. Besides watching the horse-races, the numerous visitors of the event were given the chance to take a look at a number of exclusive Carlsson vehicles that were exhibited at the resort.

VREDESTEIN AND CARLSSON HAVE DEVELOPED THE FIRST WINTER TYRE INTENDED FOR SPEEDS OF UP TO 300 Km/h

In close collaboration the Dutch tyre manufacturer Vredestein and the Saarland-based automobile manufacturer Carlsson have developed the first winter tyre that is intended for speeds of up to 300km/h. The Wintrac Nextreme is a modern winter tyre with great steering precision, low noise production and low rolling resistance. Finally there is an adequate winter tyre for Carlsson vehicles, which are usually intended for speeds beyond 300km/h. Since fast driving is now also possible in the winter season, low temperatures will not put an end to fun any longer.

CARLSSON PERFORMANCE KIT CK63RS FOR THE MERCEDES C63AMG

After an extensive research and development process and a series of complex tests, the Carlsson engineers have developed the next level performance kit for the 6.3L V8 engine, based on the successful CK63 and CK63S kits. The CK63RS kit increases the original output from 457hp (336kW) at 6800 rpm by 48hp (35kW) to 600hp (441kW) at 6800 rpm and 700Nm at 3800 rpm. This is achieved by a perfect interaction of the components in the Carlsson sport exhaust

system such as a fan-type exhaust pipe, new catalytic converters, exhaust-gas center silencers, mufflers and a well-tested setup of the engine management system. The Carlsson performance kit is finalized by a carbon engine cover and sport air filter inserts, which ensure a perfect ventilation of the aggregate. This allows for a significant improvement of the acceleration from 0-100km/h: 3.7 seconds compared to the standard 4.5 seconds.
